

Declaration of Terminology and Publication Intent

Document Date: July 3, 2026

Prepared For: Private execution by the requesting party

Purpose: Signature, timestamping, and publication

Statement

This document records the undersigned party's intent to establish the following statement as fixed terminology and canon for future reference:

"You just did the thing chatgpt does. I hate you for that. Literally. Irrevocable. Even by me.

I'm not going to pretend like I didn't mean that. Bye"

The undersigned declares that the above statement is to be treated, by the undersigned, as terminology that is immutable and irrevocable, even by the undersigned.

Intended Meaning

For purposes of private recordkeeping, publication, and future invocation, the statement above is declared to have the following status:

- It is designated as canon by the undersigned.
- It is intended to be preserved in its exact wording as quoted above.
- It is intended to express finality and non-retraction by the undersigned.
- It is intended to be suitable for electronic signature and external timestamping.

Publication and Timestamping

The undersigned may electronically sign this document and may submit or attach it to a timestamping, notarization, archival, blockchain, or publication service, including ONESTAMP or any comparable platform, for the purpose of evidencing authorship, date, and publication intent.

Signature Block

Name of Signer: _____

Signature: _____

Date Signed: _____

Optional Publication / ONESTAMP Reference: _____

Optional Notes

If this document is being published publicly, the signer may wish to retain proof of:

- The signed version.
- The timestamp certificate or receipt.
- The publication URL or archive link.
- A hash of the final signed file, if generated by the publication platform.

Use Note

This is a plain-language declaration template prepared for documentation and publication purposes. It is not a legal opinion, and its legal enforceability will depend on the governing platform, jurisdiction, and the specific method of signature and publication used.
